ALI RAZA

Senior Backend Developer (Python & Cloud Specialist)

Email: ali.raza.dev@gmail.com | Phone: +92 300 5550192 | Location: Lahore, Pakistan | LinkedIn: linkedin.com/in/ali-raza-backend

PROFESSIONAL SUMMARY

Results-driven Backend Developer with 4+ years of dedicated hands-on experience architectural design, building scalable RESTful APIs, and optimizing database performance using Python, Django REST Framework, and PostgreSQL. Demonstrated expertise in containerizing multi-service microservices using Docker and configuring automated CI/CD deployment pipelines on Kubernetes and AWS.

CORE TECHNICAL SKILLS

Backend Frameworks:	Python 3.11+, Django, Django REST Framework (DRF), Celery, Redis
Database & Querying:	PostgreSQL (Indexing, EXPLAIN ANALYZE Query Optimization, Partitioning), ORM
DevOps & Cloud:	Docker, Docker Compose, CI/CD (GitHub Actions, GitLab CI), Kubernetes, AWS EC2/S3
Architecture & Tooling:	RESTful APIs, Microservices Architecture, Git, PyTest, OpenAPI/Swagger

PROFESSIONAL EXPERIENCE

Senior Python / Django Developer — TechLogix Solutions

Jan 2022 – Present | Lahore, Pakistan

- Architected and deployed high-throughput backend services for enterprise clients using **Python** and **Django REST Framework (DRF)**, supporting over 250k daily active users.
- Engineered **PostgreSQL query optimization** strategies, utilizing complex indexes, materialized views, and refactoring ORM queries to reduce database response times by 42%.
- Containerized complex microservice workloads using **Docker** and **Docker Compose**, ensuring environment parity across local, staging, and production clusters.
- Designed and maintained automated **CI/CD pipelines** using GitHub Actions, enabling zero-downtime automated deployments and continuous integration testing.

Backend Software Engineer — Systems Limited

Jun 2020 – Dec 2021 | Lahore, Pakistan

- Developed secure RESTful API endpoints in **Python/Django** for financial transaction management software, maintaining 99.98% uptime.
- Managed complex **PostgreSQL** relational database schemas, handling transactions, data migration scripts, and database scaling.
- Integrated Docker containers into daily developer workflows to streamline team onboarding and unified dev environments.

KEY ENGINEERING PROJECTS

Automated Logistics & Fleet Monitoring Engine 2023

- Built a distributed telemetry ingestion service using Python, Django REST Framework, and Celery backed by a tuned PostgreSQL instance.
- Setup end-to-end multi-stage **Docker CI/CD build scripts** that reduced deployment pipeline times by 35%.

EDUCATION

Bachelor of Science in Computer Science (BSCS) Graduated: 2020
National University of Computer and Emerging Sciences (FAST-NUCES)
