Dedicated Backend Software Engineer with 4 years of hands-on experience designing and maintaining high-throughput distributed microservices using Python and Django REST Framework. Proven expertise in PostgreSQL query optimization, B-Tree and GIN indexing, and Docker multi-stage containerization. Extensive track record deploying automated CI/CD pipelines with zero downtime.

CORE TECHNICAL SKILLS
Programming Languages: Python 3.10-3.12 (4 years, Expert), SQL, Bash
Web Frameworks: Django (4 years, Expert), Django REST Framework, Celery, Pytest
Databases & Storage: PostgreSQL (3 years, Advanced), Redis caching, Query Optimization
DevOps & Cloud: Docker (2 years, Proficient), Docker Compose, CI/CD pipelines, AWS, Git

WORK EXPERIENCE
Senior Backend Developer | CloudScale Solutions | 2022 - Present
- Architected scalable RESTful services in Python and Django REST Framework processing 8M+ daily requests.
- Optimized high-load PostgreSQL database queries with composite indexing, reducing latency by 45%.
- Built and managed production Docker containers and orchestrated automated GitHub Actions CI/CD.
- Implemented asynchronous Celery job queues backed by Redis for email and transactional pipelines.

Backend Software Engineer | Apex Tech Innovations | 2020 - 2022
- Built transactional API services using Python and Django with PostgreSQL datastores.
- Containerized application services using Docker and configured Docker Compose for local environments.
- Wrote comprehensive unit and integration test suites using pytest with 92% coverage.

PROJECTS
FinStream Distributed Ledger (Open Source)
- High-throughput financial transaction engine written in Python and Django REST Framework.
- Benchmarked at 3,200 requests/sec with PostgreSQL connection pooling and Docker Compose orchestration.

EDUCATION & CERTIFICATIONS
Bachelor of Science in Computer Science (B.S.) | NUST (2016 - 2020)
Docker Certified Associate (DCA) | Docker Inc. (2023)
